RunForLife Instruction Manual

Application requirements:
- Android Studio
- minSdkVersion   16
- targetSdkVersion   20

Software:

We have used MAMP   software to run the application.

Note:
The database is available only in our server.
And thus   TO   RUN   THE   APPLICATION   one   needs   to
access   the   MySQL   server   using   the   developer's
(Ankur Pandey) IP   address.
